- ✓ Fume free, no drip, easy to use spray gel formula
- ✓ Completely safe to use indoors and cleans up with just water

Description

EZ Strip Adhesive & Glue Remover is a non-toxic water-based remover that is PH neutral. Suitable for; all woods, metals (including aluminum), concrete, ceramic, stone, brick, and other hard surfaces. EZ Strip Adhesive & Glue Remover is designed to remove all kinds of adhesive, glue residues, tree pitch, tape residues stickers, decals, gum and more safely from most hard surfaces.

Caution: may etch some plastics, always test a small area first. Not designed for use on painted surfaces unless they that have been baked on or UV hardened.

Physical Properties

This 100% cling spray gel gives a slight almond odor but without any fumes. Gel is easily cleaned up with just water and is skin safe. Product is white in color to ensure even application.

Typical Performance

Determine performance time by applying product and test scraping/scrubbing a small area every few minutes until material is easily removed. Thicker coatings and residues may require multiple applications. For stickers, decals, and tape remove as much of the top layer off if possible or carefully score surface before applying product. For improved performance, cover with plastic for longer set times to prevent drying.

Removal timing is subject to substrate, age and type of coating, layers of coating.

If possible, always test a small area first for best removal time.

Environmental

VOC content of this product is minimal, 0.000004%. All materials are readily biodegradable & water soluble. EZ Strip Adhesive & Glue Remover is not a marine pollutant and can enter water-sources and drains, care must be taken to ensure that any paint solids do not enter surface water drains. Disposal of this product or any by-products should always comply with the requirements of the Environmental Protection Act and its subsidiary regulations and any regional Local Authority requirements. EZ Strip products can be disposed of safely in your household garbage.

Instruction For Use

Adhesive & Glue REMOVER

See our how-to videos on EZstrip.ca for detailed instructions and project demos!

USAGE INSTRUCTIONS

Shake well before use. Apply liberally to coat the area. For paint, sticker residue, tough stains, or glue residues, wait ten minutes before applying a second coat. Do not let EZ Strip dry out as it will stop working, if EZ Strip does dry out, re-apply.

Determine performance time by test scraping/scrubbing a small area every few minutes until material is easily removed. Thicker coatings and residues may require multiple applications. For improved performance, cover with plastic for longer set times.

Use scraper to remove softened material and discard safely. Finish removal using a scouring pad with water to remove remainder of softened material. Hint: Use bristle brush for porous surfaces.

To finish, wipe with a damp cloth. Must be neutralized with water or EZ Strip will continue to work. Allow surface to dry completely before sanding or painting. *For best performance use EZ Strip above 10°C (50° F). Do not use in direct sunlight. Do not freeze. May etch some plastics, always test and time a small area first.
